

"Saving the world from loneliness"

Team Bodker

What problem do we solve?

Our app will fight loneliness by supplying the user a quick entry to world full of his favorite content with other users who share the same passion.

What is so special about us?

Our app will eliminate the element of choice. We often believe that the ability to choose is a good thing, but it actually slows us down.

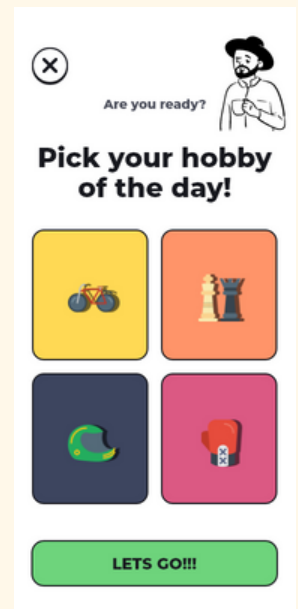

Our goal?

To make users feel they are getting real value content, and create a more intimate and friendly environment for the content creators with their followers.

Daniel Lotker

Pick of the day!

Each day, a user can pick from the explorer a niche, and he will randomly assigned to a virtual live room depending on the selected niche.

Live sessions!

Now with the social isolation caused by the pandemic, our users can enjoy a free live session in their field of choice.

The content creators!

The creator will have valuable information about their room participants, and would be able to see personal comments users left for them.
